TAKE OFF

WORLD CUP EDITION

"After 6 years of design and testing I have collaborated with Mistral to create this remarkably responsive production 8'0". All the prototype research I've done competing on the Stand Up World Tour combined with Mistral's board building technology has me excited about what may be the most progressive production board on the market. Created for a variety of waves and accelerated performance the 8'0" World Tour Model will take your wave riding beyond expectations."

Robin Johnston

- The 8'0 Take Off has a progressive rocker from nose-to-tail that delivers vertical snap off the lip and tight turning in the pocket.
- The outline curves resemble a „shortboard“ and are designed for maneuverability and radical surfing.
- Low volume rails increase hold and responsiveness and make it easy to race down the line.
- The flat deck flows into pulled-down rails allowing for hard, controlled carving without missing volume.
- Quad / Thruster fin set up (original FCS System)
Can be ridden as a thruster or a quad. Both options compliment the performance uniquely.

Length: 8'0 (243 cm)
Width: 28'5" (72cm)
Thickness: 4" (10cm)
Volume: 105l

Fins: delivered with 5 fins. (3x original FCS Truster M7, for Quad-Setup additional 2x G1000)

PRODUCT RANGE 014

Ventura 14'0"

CRUISER

If you look for a combination of speed, stability and fun, and this in all water conditions, then the Mistral Ventura Cruiser is the perfect board for you. The innovative Mistral x-bow shape enables the board to cut through the water like a knife. This reduction of hydrodynamic drag translates into speed and gives you an immediate feel of glide. Practically, this board provides great stability and ensures a maximum of propulsion through less paddling effort. The super light Mistral Ventura glides smoothly through flat or choppy water and always gives you a feeling of reliability and precision. It's fantastic gliding capacity makes the big volume Mistral Ventura an ideal cruiser board which even 2 people can have fun on.

- Innovative Mistral x-bow design originally from the unique Mistral M1 Race line.
- Super light full double wood-fiberglass compression sandwich technology.
- Extended nonslip EVA foam to the tail for superior grip in tight turns.
- With its length and dimensions, the lightest board on the market.

Mistral Ventura 12'6"

Length: 12'6" (380cm)
Width: 27,5" (70cm)
Thickness: 6 7/8" (17,5cm)
Weight: 25.5 lbs (11,6 Kg)
Volume: 255l

Fin: US Box

Mistral Ventura 14'0"

Length: 14'0" (427cm)
Width: 27,5" (70cm)
Thickness: 6 7/8" (17,5cm)
Weight: 28 lbs (12,6 Kg)
Volume: 315l

Fin: US Box

PRODUCT RANGE 014

The M2 Race 12'6 and 14'0 is a high performance flat-water racer for pros and experts. It fuses the positive gliding characteristics of a kayak with those of a surfboard. The innovative, conical shape always creates a minimum of wet surface – no matter the weight of the paddler – leading to a higher speed potential. The M2 Race has an exceptionally narrow outline and is made in ultra- light specialized full carbon construction for professional flat-water racing. Due to a low sitting nose rocker and an extremely pointed shape, it glides through flat water with noticeably lower resistance. Another mind-blowing innovation is the front fin of the M2 Race, which generates a maximum on direction stability and lowers the paddling and steering effort of the racer. The standing area is lowered to increase overall stability, making it possible to ride this narrower design with full power. The M2 Race is trimmed for 100% speed in flat-water conditions and is definitely faster than anything we ever built. The M2 Race 12'6 is produced for the European market, while the M2 Race 14'0 more appropriate for the US SUP racing scene. If there is to be a regulation to one racing class in future, Mistral is well positioned.

- Innovative conical Kayak shape
- Exceptionally narrow outline
- New Mistral front fin for a maximum of direction stability
- Lowered standing area for increased stability
- Ultra-light full carbon construction

M2 Race 12'6 SUP
Length: 12'6 (380cm)
Width: 23.6' – 26' (60cm – 66cm)
Thickness: 8.6' (22cm)

M2 Race 14'0 SUP
Length: 14'0 (427cm)
Width: 24.4' (62cm)
Thickness: 8.3' (21cm)

PRODUCT RANGE 014

Mistral All-round Fitness System

Mistral makes the difference - we didn't just design a new Mistral Fitness SUP Board, we already went one step further and invented a Fitness SUP Board which can be used almost like an exercise machine in a fitness studio.

We equipped the Mistral Kailua 11'5 with the innovative Mistral all-round elastic band system. This system allows you to fix super strong rubber bands with hooks on multiple tie-down points on the board. The tractive force of these elastic bands is easily adjustable and allows you to gradually increase the intensity of your exercise, which is an essential point in any comprehensive training program. Go out on the water and create a whole new fitness experience with the new Mistral all-round elastic band system attached to the Mistral Kailua Fitness SUP Board.

- Super strong and durable rubber bands
- Heavy-duty hooks for fixing the elastic bands
- Multiple tie-down points on the board
- Adjustable tractive force of the elastic bands
- Pleasant non-slip handles

PRODUCT RANGE 014

Mistral Roof Rack Pads

Roof rack pads are designed to be used with existing fixed roof racks to protect your board from the hard bars. You will also need some Mistral Rack Straps to tie your board down.

Mistral Roof Rack Pads:

- Roof rack pads for bar style roof racks
- Durable cushioned pads sit between boards and roof racks
- Velcro fastened
- Pair of roof rack pads come in a light pouch and pack away very small

mistral®

PRODUCT RANGE 014

Mistral Rack Straps:

The Mistral Rack Straps are strong durable camlock straps for fixing your board to a normal roof rack. They come in a standart 3,4 m length which can be adjusted using a simple buckle to any size. Set them to the size you want and eliminate the hassle of free ends. Just secure them under the provided shock cord.

- Zinc plated spring loaded camlock.
- Heavy duty webbing strap
- Neoprene protector
- Each strap 3,4 m long
- Pair of adjustable tiedowns come in a light pouch and pack away very small

Mistral M2 Race Fin

The new M2 Race fin is a pure flat-water racing fin. This fin was developed from the symbiosis between flat-water touring and race fins. Its extended horizontal dimension, a large base and much of the surface area reaches back (seeweet), make it difficult for the fin to pivot and keeps the board going as straight as possible. The M2 Race fin is made of ultra-light carbon which allows it to be thinner to cut down on the drag yet keep its effective stiffness. This fin is designed to help the tracking ability of your board while also allowing it to maneuver amongst competitors and make tight turns around buoys.

The Mistral M2 Race fin is the ideal fin for flat-water races. If you are looking for a fin that still tracks well and has as little drag as possible, this is the right fin!

- Symbiosis between flat-water and race fins
- Innovative flat-water race shape
- Light, stiff and thin to cut down the drag
- 100% carbon fiber
- Reinforced front edge by ABS inserts
